Lang AI

"Speak with confidence, we'll understand you perfectly"

Roles

Product Owner: Ricardo González

Tech Lead: Erick Padilla

Delivery Manager: Ricardo J. Olmedo

Scrum Master: Diego Chuc

Quality Manager: Humberto Rodríguez

Mission

To make understanding English accessible and effective for everyone. By using artificial intelligence and speech recognition tools, we aim to revolutionize the way we grade and analyze english speaking employees. We have the goal to create a global community of confident English speakers.

Vision

To be the leading provider of AI-powered language assessment solutions, improving the way in which people improve their English skills. We believe that language should not be a barrier to personal and professional growth, and we are committed to making language assessment more accessible, objective, and efficient through the use of AI technology.

Values

Transparency: There should be no barriers between our knowledge, and your experience

Persistence: We won't stop until the product is just right

Fairness: Accessibility for everyone is a priority

Inclusion: Everyone's voices should be heard

Integrity: The quality of the product goes beyond the deadline

Problem

Wizeline needs evidence of video recordings of their employees for them to be evaluated and needs to assess the English level of its employees to know how well trained they for their future clients.

Our Solution

Deploy a website where employees can record themselves, reading a script for their future evaluation. Working with Wizeline, a speech recognition software will be implemented to analyze, and address the results both to the users, as well as the administrators.
